Hi Cynthia -- I thought I'd write Katie and propose coming in to talk w/ them Wens a.m. Is that OK w/ you, or has someone already committed? I'm working a few hours in Boulder this morning before hitting the road. I'll bring some copies of the handout for the ARSG meeting/Availability Session/La Plata meeting. - Rob

> This is Katie Shapiro and I am a middle school science teacher at Silverton School. For the first semester, the students are trying to answer the question: why is Cement Creek red? We are studying the properties of matter and next week will be starting to investigate the properties of water.

>

> Is there a presentation happening on Tuesday that you think would be relevant to the students? We have science from 8-9 but let me know if there is another time that would work better. Or, would someone be able to come to the MS and give a presentation on Tuesday from 8-9 about the upper Animas watershed or Cement Creek specifically?
